

5221-* *LIGHT SIGNALING* PUSH BUTTON

BENEFITS

- Large Button
- LED Confirmation Light
- Easy to Install
- Easy to Operate
- Two Twisted Pair Cable

The Tech Works 5221 is a Push Button Station in a semi-flush ABS plastic enclosure for durable emergency signaling. This unit is available in 4 different faceplates: HELP, CALL, CODE BLUE, and CHECK IN. A large button is provided with an integral call confirmation LED. This is a passive button and light assembly designed for use with Intelligent Substations listed. A central system controller tells the intelligent Substation to activate the LED.

Design Information

12 VDC - @ 0 mA Minimum / 2 mA Max.
 Dimensions - 2.75" W, 4.5" H, 1.25" D
 Standard 1-Gang Electrical Box Mounting
 Wiring is Two Twisted Pair Cable
 22 Awg Max.

Associated Equipment

- 5223-* Wide Angle Corridor Light
 5230-* Substation w/Screw Terminals without Lights or Buttons (Momentary Contact) (Semi-Flush Mount)
 5250-* Substation w/Screw Terminals without Lights or Buttons (Momentary Contact) (Surface Mount)
 2528 Intercom Substation w/Remote Digital Control

Architects' and Engineers' Specifications

The Push Button Station shall be a standard one-gang electrical box-mounting device constructed of ABS plastic with a water-resistant faceplate. A large 1.25-inch square push button clearly labeled shall be included with a call confirmation light to indicate that a call has been placed. The push button Station shall be a passive electronic device requiring no more than 2 mA at 12 Volts DC for full operation.

The Light Signaling System shall be Tech Works Model 5221.

5221-C	Call
5221-H	Help
5221-CK	Check-In
5221-B	Code Blue
