

The Tech Works 2052 is an Emergency Pull Cord Speaker Station with acknowledge light and cancel button in a semi-flush ABS plastic enclosure for durable emergency signaling. A nylon pull cord provides the patient with convenient call-for-help and the staff is provided with a distinctive "CANCEL" button to reset the station. A Hi-Fidelity 100-Ohm Speaker allows staff to talk directly to the patient to confirm the call. An integral confirmation LED tells the user that a call-for-help has been sent. This is a passive Speaker button and light assembly designed for use with Intelligent *Voice-Call* Substations listed.

Design Information

Speaker 100-Ohm 2 Watt
12 VDC - @ 0 mA Minimum / 3 mA Max
Dimensions - 4.625" W, 4.5" H, 1.25" D
Standard 2-Gang Electric Box Mounting
Wiring is Three Twisted Pair Cable-22 Awg Max
(1 for Audio, 1 for Switch Contact, 1 for Call Confirmation LED)

2052 INTERCOM EMERGENCY PULL CORD SPEAKER STATION

w/ ACKNOWLEDGE LIGHT AND
CANCEL BUTTON

BENEFITS

- Hi-Fidelity 25 V Speaker
- Durable Nylon Pull Cord
- LED Confirmation Light
- Easy to Install
- Easy to Operate

Associated Equipment

2051	Intercom Speaker Station w/Phone Jack and Cancel Button
2590	Telephone Interface Master w/Caller I.D.
5234-*	Corridor Light

Architects' and Engineers' Specifications

The Voice Communication System Emergency Pull Cord Speaker Station shall be a standard two gang electrical box mounting device constructed of ABS plastic. A 25 Volt Hi-Fidelity Speaker with power taps of 1/4 and 1/2 watt with a large 1.25" push button clearly labeled "CANCEL" shall be included with a durable nylon pull cord to allow pull-for-help operation. A call confirmation light shall be included to indicate that a call has been placed. The pull cord station shall be a passive electronic device requiring no more than 3 mA at 5 Volts DC for full operation.

The Voice Communication System Intercom Emergency Pull Cord Speaker Station shall be Tech Works Model 2052.
