

The Tech Works **5131** is a recessed Duress Alarm Push Button with Acknowledge Light designed for hidden alarm application under a Judge's Bench, Bailiff or Clerk's Desk, or Cashier/Teller's Counter. An easy to "feel" button is recessed inside the unit allowing easy access under duress situations yet is impossible to bump and cause accidental false alarms. When used with the **5230-DCS**, the push of a button sounds a tone at the Master and lights a *flashing* LED on both the **5131** and the Master to indicate a call has been placed. When the call is acknowledged by the Master, the *flashing* LED changes to *steady* to indicate "help" is on the way. This is a passive button and light assembly designed for use with Intelligent Substations.

#### Design Information

12 VDC - @ 0 mA Minimum / 2 mA Max.  
Dimensions - 2" W, 1" H, 2.3125" D  
Wiring is Two Twisted Pair Cable  
22 Awg Max.

## 5131 DURESS ALARM PUSH BUTTON

w/ACKNOWLEDGE LIGHT

#### BENEFITS

- Low Profile
- False Proof  
Concealed Button
- Easy to Install
- Wide Angle LED  
Acknowledge Light
- Low Cost

#### Associated Equipment

*Clinic-Call™, Court-Call™, Light-Call™*

#### Architects' and Engineers' Specifications

The recessed Duress Alarm Push Button shall be a surface mounting device with integral acknowledge light. To prevent accidental false alarms, the button shall be recessed inside a durable plastic housing measuring no more than 1" high, 2" wide, and 2.3125" deep. The call acknowledge light shall be a wide angle super bright LED for long life reliable operation .

The Light Signaling System Duress Alarm Push Button shall be Tech Works Model 5131.
